

TARDEE TOKEN

Sending Water Bears to Mars & returning them safely to Earth

INTRODUCTION

Tardee Token is the world's first asset-backed meme coin with utility, issued on the Solana Blockchain. **\$2.22 billion in assets** have been pledged to back the Tardee Token; exchangeable assets include diamonds and graphene. Our goal is to put Water Bears (the world's toughest animal) and a man on the planet Mars and return them safely to Earth within a decade. This includes developing next-generation tools like AI, batteries, AI microchips, EVs, and electronics for the mission.

BUILDING A DECENTRALIZED AI ON SOLANA

The Tardee Token will be building an AI Layer on the Solana Blockchain, called the **"Tardee AI-Blockchain"**. The Tardee AI-Blockchain is a type of global neural network consisting of AI-Nodes hosted by the Tardee community; the global neural network will be interconnected with the Battery AI-Blockchain and hundreds of other blockchains to create an ethical Decentralized Artificial Intelligence called BatteryAGI. BatteryAGI will provide Artificial Intelligence (AI), Artificial General Intelligence (AGI), and Artificial Super Intelligence (ASI) functionality on the Solana Blockchain.

MOONSHOT TO MARS WITH THE US BATTERY CONSORTIUM

Tardee Token has founded the US Battery Consortium to send Water Bears to Mars. Water Bears have the best chance of survival on Mars. Water Bears (Tardigrades) are small invertebrates and have been around for 600 million years. Water Bears are some of the toughest and most indestructible creatures, containing superpowers reminiscent of Wolverine in the X-Men. Water Bears can survive the vacuum of space, pressures 6 times the atmospheric pressure of the Mariana Trench, endure radiation blasts 1,000 times higher than most animals, live 20 months at freezing -200C, survive boiling water at 150C, etc.

100% CUSTOMER SATISFACTION GUARANTEE

From Round 0 to Round 7, we have a **"100% Customer Satisfaction Guarantee"** of the Pre-sale of the Tardee Tokens. This means at the end of the 24-month cycle, if the customer is not satisfied, Tardee Token is willing to refund the Tardee Tokens at the original price purchased if the token holder wants. This provides token buyers with no downside and only upside to participate in the purchase of the Tardee Tokens. There is zero risk for the buyers.

Battery Coin Discount Coupon: From Round 0 to Round 10, for every 100 Tardee Tokens purchase, 1 “Battery Coin Discount Coupon” will be issued. Each coupon will allow the coupon holder to buy one Battery Coin at a 15% discount from the market rate during the Battery Coin Token Presale. Battery Coin will be one of the largest asset-backed sovereign community currencies in the world, and will bring additional value to Tardee Token holders.

Exchangeability into Other Cryptocurrencies: Tardee Token will be exchangeable into other currencies at allied exchanges at the end of the Pre-sale, during the launch of the Tardee AI-Layer 2 on Solana.

Exchangeability into Assets: The Tardee Token will be direct exchangeability for graphene oxide, graphene, and diamonds (& designer jewellery) backing Tardee Token.

Vesting Periods: The vesting period for Rounds 0 to 15 is 24 months. The vesting period for rounds 16 to 20 is 18 months. There is an 8.80% Annual Staking Rewards, so you earn during the vesting periods.
