

BATTERY COIN

Powering the AI & Battery Revolution

INTRODUCTION

The Battery Coin is a P2P Sovereign Asset-Backed Private Community Currency. **Over \$28 billion annually in assets** have been pledged to back it. Battery Coin will “**Power the AI and battery Revolution.**” This includes developing next-generation hemp batteries and Artificial Intelligence.

BUILDING A DECENTRALIZED ARTIFICIAL INTELLIGENCE (DAI) PLATFORM

Battery Coin will build an **ethical Decentralized Artificial Intelligence (eDAI)** Platform on the Bitcoin network that will have 5000x more computing power than ChatGPT. Token holders will have access to the **Medical Super Intelligence (MSI), Healing Centers & AI-MedBeds** trained on the accumulated medical knowledge of humanity to revolutionize healthcare, longevity, and well-being. We aim to achieve AGI by 2026-2029. We will provide AI functionality to hundreds of blockchains, such as Bitcoin, Ethereum, Solana, Cardano, Avalanche, BNB, and more.

BILLIONAIRES GOING BIG ON THE \$10 TRILLION AI OPPORTUNITY

Battery Coin is your portal for participating in the AI revolution. Warren Buffett has allocated nearly 46% of his \$410 billion portfolio to AI, seeing the immense potential in this transformative technology. Similarly, Bill Gates has 35% of his portfolio in AI, and other visionaries like Elon Musk, Mark Zuckerberg, and Jeff Bezos are heavily funding AI ventures, recognizing it as the next \$10 trillion-dollar opportunity. By buying Battery Coin, you are positioning yourself for unprecedented growth in AI.

BATTERY COIN PRIVATE PRE-SALE: 100% CUSTOMER SATISFACTION GUARANTEE

For the Battery Coin Private Pre-sale, from Round 0 to Round 6, we have a “**100% Customer Satisfaction Guarantee**”. This means at the end of the 24-month cycle, if the customer is not satisfied, Battery Coin is willing to refund the Battery Coin Tokens at the original price purchased if the token holder wants. This provides token buyers with no downside and only upside to participate in the purchase of the Battery Coins. There is zero risk for the buyers. The prices for the Pre-sale are shown below:

The Token Swap Event: We plan a Token Swap upon the mainnet launch. The swap procedure will involve the exchange of ERC20 – Battery Con Tokens (\$BAC) for Battery Coins (\$BATT). The process will be carried out manually via MEW or other wallets and through an allied exchange. The essence of the migration of tokens was the transfer of the balance of Battery Coin Holders from Ethereum wallets to new wallets compatible with the Battery Blockchain Platform

Exchangeability into Other Cryptocurrencies: Battery Coin will be exchangeable into other currencies at allied exchanges at the end of the Pre-sale, during the launch of the mainnet.

Exchangeability into Assets: The Battery Coin will be direct exchangeability for supercars, hypercars, graphene oxide, graphene, diamonds, carbon fiber, cash, bitcoin, other currencies, investments, and other products backing Battery Coin.

Vesting Periods: The vesting period for Rounds 0 to 15 is 24 months. The vesting period for rounds 16 to 20 is 18 months. There is an 8.80% Annual Staking Rewards, so you earn during the vesting periods.
